

How to Save and Print a PDF document in WebCT or on the Internet

The PDF document will open in Adobe Reader. It may open as a new page or it may open **within** your WebCT or Internet page (as in example below).

To **SAVE** the PDF document, click on the computer disk icon directly above the text of your file.

To **PRINT** the PDF document, click on the printer icon directly above the text of your file.

Note: If you use the **File** pull-down menu at the top of the screen, to print or save you will probably get a blank page or a page that has the WebCT frame and page number only.
